SC50

SC 250

\$915 **\$879**

Cost effective RF Wireless Lone Worker Solution - Employee wears Super Cell Model 50, presses call for help button, supervisor receives the emergency signal on a Super Cell Model 250 - **Ideal for small industrial operations.**

SC250

SC 250

\$1,120 **\$999**

Super Cell Model 250 provides personel distress alarm with 2 way signaling, motion sensing with On/Off capabilities, rechargable AA lithium batteries. Ideal for small to mid size industrial operation where motion sensing is desirable.

TP-M-MAN

SC 250

\$1,135 **\$999**

Where **intrinsic safety certification** is a factor, this is an attractive package. The worker who requires UL 913 certification wears a rugged T-PASS Device which has a one touch call for help button or will call for help using the adjustable motion detector. The T-Pass will omit a loud 98 dBa audible alarm and transmit a wireless alarm to the SC 250 being worn by the supervisor. Ideal for small to mid size industrial plants where motion sensing and intrinsic safety certification is desirable.

Safety Solutions under \$2,500

SC50

MS900-R-AC

\$1,189 **\$1,099**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 50, presses call for help button,MS-900 Micro Receiver captures distress signal which **can be tied into existing alarm system** with included relay closure. It can also be tied to existing accessories such as a klaxon, strobe lights or similar equipment.

SC50

MS900-R-AC-B

\$1,267 **\$1,199**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 50, presses call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure. It can also be tied to existing klaxon , strobe lights or other accessories. This system also includes a 12VDC battery backup

SC50

MS900-R-AC-B-LS

\$1,675 **\$1,599**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 50, presses call for help button,MS-900 Micro Receiver captures distress signal which automaticall activates included strobe light and siren. Also includes 12VDC battery backup **This turn-key package is ideal for small to mid size industrial operations.**

SC 250

MS900-R-AC

\$1,394 **\$1,299**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 250 with adjustable motion detector and one touch call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure. It can also be tied to existing accessories such as a klaxon , strobe lights or similar equipment.

SC250

MS900-R-AC-B

\$1,472 **\$1,389**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 250 with adjustable motion detector and one touch call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure. It can also be tied to existing accessories such as a klaxon , strobe lights or similar equipment.Includes battery back up.

SC50

MS900-R-AC

ATD

\$1,684 **\$1,599**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 50, presses call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure. It can also be tied to existing accessories such as a klaxon, strobe lights or similar equipment. An automatic telephone dialer capable of dialing up to eight different numbers is included in this package.

SC50

MS900-R-AC-B

ATD

\$1,762 **\$1,599**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 50, presses call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure.Includes battery backup It can also be tied to existing accessories such as a klaxon, strobe lights or similar equipment. An automatic telephone dialer capable of dialing up to eight different numbers is included in this package.

SC50

MS900-R-AC-B-LS ATD

\$2,170 **\$1,999**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 50, presses call for help button,MS-900 Micro Receiver captures distress signal which automaticall activates included **strobe light and siren**. Also includes 12VDC battery backup This turn-key pakage is ideal for small to mid size industrial operations.

SC250

MS900-R-AC- ATD

\$1,889 **\$1,799**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 250 with adjustable motion detector and one touch call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure. It can also be tied to existing accessories such as a klaxon , strobe lights or similar equipment..An automatic telephone dialer capable of dialing up to eight different numbers is included in this package.

SC250

MS900-R-AC-B ATD

\$1,967 **\$1,899**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 250 with adjustable motion detector and one touch call for help button,MS-900 Micro Receiver captures distress signal which can be tied into existing alarm system with included relay closure. It can also be tied to existing accessories such as a klaxon , strobe lights or similar equipment.Includes battery back up.An automatic telephone dialer capable of dialing up to eight different numbers is included in this package.

SC250

MS900-R-AC-B-LS ATD

\$1,919 **\$1,799**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 250 with adjustable motion detector and one touch call for help button,MS-900 Micro Receiver captures distress signal which automatically activates the included strobe light and siren. **This turn key solution** also includes battery back up.Also, an automatic telephone dialer capable of dialing up to eight different numbers is included in this package.

SC250

MS900-R-AC-B-LS ATD

\$2,375 **\$2,299**

Cost effective RF Wireless Lone Worker Solution -Employee wears Super Cell Model 250 with adjustable motion detector and one touch call for help button,MS-900 Micro Receiver captures distress signal which automatically activates the included strobe light and siren. This turn key solution also includes battery back up.An automatic telephone dialer capable of dialing up to eight different numbers is included in this package.

TPII

MS900-R-AC

\$1,409 **\$1,299**

Where intrinsic safety certification is a factor, this is an attractive package. The lone worker who requires UL 913 certification wears a rugged T-PASS Device which has a one touch call for help button or will call for help using the motion detector. The T-Pass will omit a loud 98 dBa audible alarm and transmit a wireless RF Distress signal that is captured by the Mico Receiver which can be tied into existing alarm system with included relay closure. It can also be tied to existing klaxon, strobe lights or other accessories. Ideal for small to mid size industrial operations
